SPRING TERM OPENS APRIL DESIGN.

The design of the Institution is to furnish a thorough and systematic course of instruction for young ladies, upon the plan of University instruction—each department of learning being complete within itsel—thus enabling a young and an experience of study without complete within itsel—thus enabling a young lady to select her own course of study without being restricted to any fixed routine of classes—requiring a certain number of years to finish—but in opposition to this, young ladies who have advanced further in some studies that others, can have the benefit of their former attainments, and obtain a Certificate of Proficiency in one or more schools perhaps, in the course of one tear—after which time they may bring up, with greater rapidity and success, other studies.
